

ROMPETROL

LETTER OF STATEMENT FOR REACH COMPLIANCE

Since REACH was adopted at the end of 2006, Rompetrol Petrochemicals has shifted focus from the legislative process to implementation, thereby working internally with critical Rompetrol Petrochemicals functions and affected work processes and externally with its customers and suppliers for effective transition to meet REACH requirements and deadlines.

Rompetro Petrochemicals has considered its obligation under the REACH Regulation in respect of the Product and its commercial position in relation to the Product's continued supply.

As a result, we are pleased to inform you that Rompetrol Petrochemicals current intention is to pre-register all of the eligible substances with ECHA during the pre-registration period described above and thereby to ensure continuity of supply after 1 December 2008.

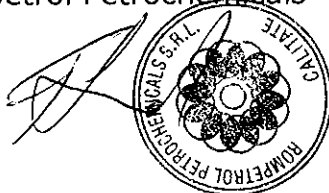

As polymers and intermediates are low-risk substances and are totally or partly exempted from registration requirements, Rompetrol Petrochemicals expects that only a small number of substances it manufactures/uses will likely be subject to the authorization process under EU REACH that the company will be able to demonstrate proper level of risk management for supported uses of these substances.

In fact, we are today in position to announce you that on 10th October 2008, Rompetrol Petrochemicals performed the pre-registration.

If you have any other queries in relation to this matter, please do not hesitate to get in touch with us.

Yours faithfully,

Felicia Andrei
Quality Manager
Rompetro Petrochemicals
